HAZDUST 3636, 3648, & 3672

HAZDUST Wet Downdraft Tables are designed to provide efficient, 97% at 5 microns, cost effective control of all flammable and non-flammable metal dust contaminants generated from a variety of manufacturing and process applications. Typically used for control of moderate to heavy concentrations of contaminants, the HAZDUST series tables can be used for grinding, polishing, and drybuffing. The auto water fill with low level shutoff system can minimize the maintenance. Washable high efficiency mist eliminator provides reduced filter replacement costs. The HAZDUST will help with compliance to local OSHA and NFPA regulations by drawing contaminants away from the operator's breathing zone and reducing the flammability concerns with metals such as aluminum and titanium.

The HAZDUST unit comes standard with "Dust Blocker Technology", stainless steel construction on wetted surfaces, direct drive non-sparking blower and TEFC motor, polypropylene mist eliminator, auto water level control with low level shutoff, and a factory pre-wired control panel. Three standard table top sizes are available 36" x 36", 36" x 48", and 36" x 72". Table top air velocities are a minimum of 325 or more feet per minute. Typical table top loads for the bench are 75 lbs per square foot.

Unit Type	HP	CFM	Table Size	LxDxH (in.)
HAZDUST3636	3.0	2000	36" x 36"	36 x 64 x 86
HAZDUST3648	5.0	3000	36" x 48"	48 x 64 x 86
HAZDUST3672	7.5	4800	36" x 72"	72 x 64 x 86

Base adds 18.5" to width and 4" to depth

FEATURES

- ▶ Airflows range from 2000 to 4800 CFM depending on table top size and motor horsepower.
- ▶ Direct drive non-sparking aluminum backward curved blower
- ▶ Washable polypropylene mist eliminator
- ▶ Aluminum non-sparking grating table top work surface.
- ▶ Automatic water level control with low level shutoff.
- ▶ High level shutdown control
- ▶ Factory pre-wired control panel
- ▶ 34" table top height
- ▶ Hinged Side Panels
- ▶ Table designed for handicap accessible and sit down use.

OPTIONS

- ▶ Rubber table top mat
- ▶ Full Enclosure with lights and crane slot option
- ▶ Table Top surface such as fiberglass grating

HAZDUST 1800, 3000, & 4800

The HAZDUST Wet Dust Collectors are designed to provide efficient, 99% at 5 microns, cost effective control of all flammable and non-flammable metal dust contaminants generated from a variety of manufacturing and process applications. Typically used for control of moderate to heavy concentrations of contaminants, the HAZDUST series tables can be used for grinding, polishing, and dry buffing. The auto water fill with low level shutoff system can minimize the maintenance. Washable high efficiency mist eliminator provides reduced filter replacement costs. The HAZDUST will help with compliance to local OSHA and NFPA regulations by drawing contaminants away from the operator's breathing zone and reducing the flammability concerns with metals such as aluminum and titanium.

The HAZDUST unit comes standard with "Dust Blocker Technology", stainless steel construction on wetted surfaces, direct drive blower and TEFC motor, polypropylene mist eliminator, auto water level control with low level shutoff, and a factory pre-wired control panel. Four standard airflows are available 1800, 3000, 4000 and 4500 CFM.

Unit Type	HP	CFM	Inlet	LxDxH (in.)
HAZDUST1800	5	1500	8"	36 x 50 x 86
HAZDUST3000	10	2400	10"	48 x 52 x 86
HAZDUST4800	15	4500	14"	72 x 54 x 86

Base adds 8" width on each side and 5" depth on the back

FEATURES

- ▶ Direct drive non-sparking aluminum backward curved blower
- ▶ Washable polypropylene mist eliminator
- ▶ Automatic water level control with low level shutoff.
- ▶ High level shutdown control
- ▶ Factory pre-wired control panel
