

# Hand Held Venturi Vac

www.controlledairdesign.com - sales@controlledairdesign.com - 919 607 6765

- ❑ The vac gun makes shop blow-off and cleanup tasks a breeze.
- ❑ Unique design enables unit to act as both a blow gun and a vacuum.
- ❑ High-output venturi design multiplies air flow. For example, an input air supply of 10 cfm results in an output of approximately 100 cfm.
- ❑ Changing between **blow and vacuum modes** is accomplished by simply reversing the direction of the venturi.
- ❑ New trigger design reduces strain.
- ❑ High vacuum production with minimal air consumption.
- ❑ Made of rugged, anti-static nylon.

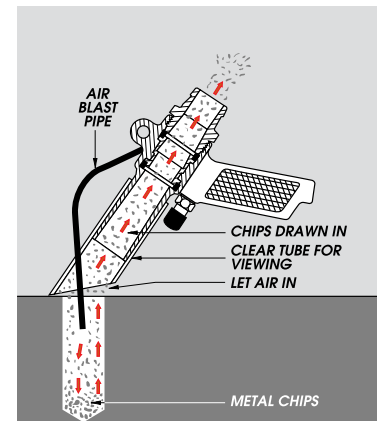

## Standard Gun

## Deep Hole Gun

The deep hole gun is a modified version of the standard gun, designed for removing chips from blind holes. The thin black tube blasts high pressure air to dislodge chips while the main nozzle draws them safely away. A clear plastic shroud protects the operator from flying debris.

## Performance Specification Chart

Pressure (PSI)	30	45	70	85
Air Consumption (CFM)	6	8	12	14
Total Discharge (CFM)	88	95	110	115
Vacuum (In Hg)	1.2	1.4	2.3	2.8

DESCRIPTION	CATALOG NUMBER
Standard Gun Only	49005
Dust Bag (Std Vac Gun, Dust Bag, Extension Tube and Clamp)	49085
Hose Kit (Std Vac Gun, 10ft. Smooth-Bore Hose, Extension Tube, and Clamp)	49080
Accessory Kit (Two extension Tubes, Crevice Tool, Vacuum Head, Vacuum Head Brush, and Round Brush)	49095
Deep Hole Gun Only	49010
Dust Bag and Clamp Only	49020
10ft. Smooth Bore Hose Only (1/4" Dia.)	49090

**Caution:** Always wear safety glasses when operating these tools. Never operate in the vacuum mode unless a hose or dust bag is attached to the exhaust end of the unit.
