

## How to Get the Freshest-Smelling, Cleanest, Most Breathable Air in Your Home or Office

It's that simple. That's because the MiracleAir™ delivers exactly what you need – clean, fresh-smelling, breathable air – from a high-performance, superior air cleaner that contains the same powerful robust odor-control components found in industrial and commercial air filtration units. In fact, the MiracleAir™ 15-pound ultra-absorbent carbon filter is one of the hardest working, most effective odor-eliminators on the market today.

What's more, the MiracleAir™ is affordable and low maintenance with a large true HEPA filter that doesn't require frequent replacement. That means compared to other HEPA units, the MiracleAir™ has four times the media for filter life that can last sixteen times longer than the competition. Plus, with its dynamically balanced external rotor motor, you enjoy quiet, smooth operation, so you barely know it's there.

In the end, that means you get affordable, quality air filtration for any room with a completely portable unit, so you can breathe easy anywhere, anytime, for a long time to come.

**From the Experts on Air Filtration –  
We Guarantee It!**

### At Controlled Air Design, quality air filtration is all we do.

We've combined our years of experience with our expertise in the commercial and industrial fields to develop the highest quality residential air filtration systems available on the market today.

In fact, we're so confident you're going to enjoy the healthy benefits of the MiracleAir™, that we warranty the unit against manufacturer's defects in parts and workmanship for *three full years from the date of purchase*.
